

SR-40 Drone - Product Specification (Sample)

The SR-40 is a mid-range commercial inspection drone.

Payload: The SR-40 has a maximum payload capacity of 2.5 kilograms, sufficient for standard inspection camera and sensor packages.

Flight time: On a single charge, the SR-40 achieves 28 minutes of flight time under standard load, or approximately 22 minutes at maximum payload.

Altitude: The SR-40 has a maximum operating altitude of 120 meters above ground level, in line with common commercial drone regulations.

Range: Maximum control range is 6 kilometers in open, unobstructed conditions.

Charging: A full charge from empty takes approximately 65 minutes using the included fast charger.
